**30** years experience

**1200** events

**90 000** customers

**7** offices based on **4** continents

## Event Format

### Format

#### PLENARY CONFERENCE

In today's highly competitive global market, where environmental regulations are becoming even stricter, Innovation remains a major competitive force for companies. Yet, for companies to get ahead with future aircraft programs and remain in the supply chain for major OEMs, it is clear that new approaches are needed. Innovation must now be pursued in a more international, efficient and systematic way. Rather than independently working in warehouses with the sole aim of developing new products, Innovation needs to be at the heart of a company's integral activities; encompassing design, manufacturing and operations as well as end-of-life product management.

#### THEMATIC WORKSHOPS

These presentations focus on either technologies or products to increase and optimise market knowledge. They will be held in parallel to the meetings.

#### ONE-TO-ONE MEETINGS

The program will offer all participants the opportunity to sign up, identify and request meetings with relevant contacts prior to the show. Schedules of meetings, based on those choices, will be pre-arranged. The one to one meetings will be held at the venue.
